

Model : AO-FDG-10-50 (option of MS-PP OR SS 304)

10 lines of Aeration tube in 1 grid, with 0.5 HP blower

Ready to use Aeration Grid with floats, specially designed for immediate use. Just connect to power supply and it starts highly efficient aeration.

- Approximately 1 unit for 750 Kg of biomass (theoretical calculation).
- No piping or separate blower required
- High flow and small bubble size – Tube size 12.5 x 25 mm – 10 mtrs
- 0.5 HP / 0.375 KW, 3 phase or single phase motor.
- Low noise - 65 db. Total weight – 22 Kg .
- Stays 1 mtr down from pond surface
- Option of SS-304 full frame or only top frame
- Non- return valve to separate blower from water
- Sturdy leak proof high wall thickness UPVC pipes and fittings to minimize air loss
- Modular design for easy assembly and storage
